This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed⁹ by International Gemological Institute (GA). L40 has essentially the chemical, physical and aplical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPI (high pressure high temperature) growth processes and may include post growth modifications to change the color. [GI utilizes the most advanced techniques and equipment currently available including. Linocular microscopes, claimond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIIR, UV-UIS-NIR, UV-man spectroscopy, and fluorescence analysis at various excitation available microtane by making the report [GI does not gree to purchase or replace the articles. Variand by making the report [GI does not gree to purchase or replace the articles.
