The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGLI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation, I.OX magnification, corrected implet loupe, binocular microscope, master color companison stones, non-contact-optical measuring device, Diamond Sure ¹⁸, Diamond View ¹⁸, Spectraphotometer and such other vanced security fractures. A duy accredited genologist or jeweles careduses with respect to the importance of and interrelationship between cut, color, clarity and carat weight.
